

## **Interim Management Report of Fund Performance**

*For the Six-Month Period Ended September 30, 2023*

*This Interim Management Report of Fund Performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the investment fund. You may obtain a copy of the interim financial report or annual financial statements, at no cost, by contacting us using one of the methods noted under Fund Formation and Series Information or by visiting the SEDAR+ website at [www.sedarplus.ca](http://www.sedarplus.ca).*

*Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the Fund's Simplified Prospectus and Fund Facts, which may also be obtained, at no cost, using any of the methods outlined above.*

*For the Fund's current net asset values per security and for more recent information on general market events, please visit our website.*

### **A NOTE ON FORWARD-LOOKING STATEMENTS**

*This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.*

*The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.*

# MACKENZIE FUTUREPATH CANADIAN SUSTAINABLE EQUITY FUND

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2023

## Management Discussion of Fund Performance

November 13, 2023

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the six-month period ended September 30, 2023 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for long-term investors looking for a Canadian equity fund to hold as part of their portfolio, who can handle the volatility of stock markets and who have a medium tolerance for risk. Before November 3, 2023, the Fund was deemed suitable for investors who had a low to medium tolerance for risk.

### Results of Operations

#### Investment Performance

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

During the period, the Fund's Series PA securities returned -5.0% (after deducting fees and expenses paid by the series). This compares with a return of 0.7% for a blended index composed of a 60% weighting in the Fund's broad-based index, the S&P/TSX Composite Index (returned -1.1%), and a 40% weighting in the MSCI World (Net) Index (returned 3.5%). All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Canadian equities declined over the period, driven lower by rising interest rates and slowing economic growth. Elevated inflation persisted, which prompted the Bank of Canada to raise its policy rate. The labour market was robust but showed signs of softening as the period progressed. Global equities rose as other central banks slowed the pace of their interest rate increases. The global economy proved resilient, and employment remained strong.

Within the S&P/TSX Composite Index, health care, energy and information technology were the strongest sectors, while communication services, utilities and materials were the weakest.

Within the MSCI World (Net) Index, Norway, Italy and the United States were the strongest-performing markets in Canadian dollar terms, while Hong Kong, New Zealand and Finland were the weakest. The communication services, energy and information technology sectors were the strongest performers, while utilities, consumer staples and real estate were the weakest.

The following discussion reflects the Fund's allocation decisions and the activities and performance of its underlying investment funds and other directly held securities. The Fund underperformed both the broad-based index and the blended index, with lack of exposure to the energy sector detracting from performance. Conversely, stock selection in the financials sector contributed to performance relative to both indices. Relative to the broad-based index, holdings in the Netherlands and stock selection in the utilities sector also detracted from performance, while holdings in the United States and stock selection in the materials sector contributed to performance. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

Relative to the blended index, stock selection in Canada and the United States detracted from performance. In sector terms, stock selection in industrials also detracted from performance.

Over the period, neither portfolio activity nor market developments significantly changed the positioning of the Fund.

### Environmental, Social and Governance ("ESG") Impact

Engagement and stewardship are a primary part of the portfolio management team's philosophy. During the period, the team engaged with five companies held in the Fund on the key theme of climate change and emissions. For example, the team met with the management of Sun Life Canada Financial Inc. to discuss the sustainability initiatives the company has been integrating into its operations.

Sun Life offers a broad range of insurance protection, wealth products and services to individuals, businesses and institutions. The company's climate-related goals have been to achieve carbon neutral operations globally from 2021, a 50% absolute reduction of greenhouse gas ("GHG") emissions in operations from 2019 to 2030 and net-zero GHG emissions in operations and investments by 2050. Its activities align with United Nations Sustainable Development Goal 13, on climate action, as it has reduced absolute GHG emissions in operations by 36.9% against a 2019 baseline.

The team also met with the management of Stella-Jones Inc., which supplies pressure-treated wood products to major electrical utilities, telecommunication and railway companies. The team discussed the company's progress with respect to climate risk reporting using the Task Force on Climate-Related Financial Disclosures ("TCFD") framework. The TCFD framework helps organizations disclose climate-related risks and opportunities more effectively through their existing reporting processes. Stella-Jones has an ambitious target of reducing its scope 1 and scope 2 greenhouse gas emissions by 32% by 2030, and plans to measure its scope 3 emissions by 2025. The GHG Protocol defines scope 1 as direct emissions from fuel burned in a company's owned or controlled assets and/or chemical leaks and spills; scope 2 as indirect emissions from purchased electricity, cooling, heat and/or steam; and scope 3 as all other indirect emissions that occur within a company's value chain.

### Net Assets

The Fund's net assets increased by 46.9% during the period to \$1.9 million. This change was composed primarily of \$0.1 million in net losses (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$0.7 million due to net securityholder activity (including sales, redemptions and cash distributions).

### Fees and Expenses

The annualized management expense ratio ("MER") for each series during the period ended September 30, 2023, was generally similar to the annualized MER for the period ended March 31, 2023. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the *Financial Highlights* section of this report.

# MACKENZIE FUTUREPATH CANADIAN SUSTAINABLE EQUITY FUND

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2023

## Recent Developments

In the portfolio management team's view, despite underperforming relative to U.S. markets over the period, the Canadian equity market remained fundamentally attractive and may receive renewed investor interest. The team expects that a peak in sales of Canadian equities by institutional investors that had occurred by the end of June 2023 could signal demand recovery. The S&P/TSX Composite Index forward earnings yield was up 7.4% at period-end, compared to 5.3% for corporate bond yields and 5.1% for cash.

Although investors remained uncertain about interest rates and the possibility of recession, the team expects both investor confidence and the corporate earnings outlook to improve as these concerns diminish. In the team's view, this environment may provide an opportunity for Canadian equities to recoup some of the ground lost relative to U.S. equities since the beginning of the period.

Effective September 29, 2023, the investment strategy of the Fund was changed. The Fund can now invest in companies that derive over 10% of their revenue from the production, supporting products or services, or distribution of nuclear energy.

## Related Party Transactions

### Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

### Other Related Party Transactions

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions in the period.

## Past Performance

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

## Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

Return of capital	–	–
<b>Total annual distributions³</b>	<b>–</b>	<b>(0.05)</b>
<b>Net assets, end of period</b>	<b>10.50</b>	<b>11.03</b>

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

## RATIOS AND SUPPLEMENTAL DATA

Series PA	Sep. 30 2023	Mar. 31 2023
Total net asset value (\$000)¹	925	654
Securities outstanding (000)¹	88	59
Management expense ratio (%)²	1.44	1.44
Management expense ratio before waivers or absorptions (%)²	1.44	1.48
Trading expense ratio (%)³	0.09	0.14
Portfolio turnover rate (%)⁴	2.53	n/a
Net asset value per security (\$)	10.46	11.01

Series PH	Sep. 30 2023	Mar. 31 2023
Total net asset value (\$000)¹	995	653
Securities outstanding (000)¹	95	59
Management expense ratio (%)²	1.03	1.08
Management expense ratio before waivers or absorptions (%)²	1.03	1.09
Trading expense ratio (%)³	0.09	0.14
Portfolio turnover rate (%)⁴	2.53	n/a
Net asset value per security (\$)	10.50	11.03

(1) This information is provided as at the end of the fiscal period shown.

(2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.

(3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

---

## Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services.

PFSL Investments Canada Ltd. ("PFSL") is the principal distributor of the Fund and receives a portion of the management fees that the Fund pays to the Manager. The proportion of the management fees paid to PFSL increases, up to a maximum amount of 65%, as the assets of the Mackenzie FuturePath Funds increase. In addition to the exclusivity granted to the Manager with respect to the distribution of the Mackenzie FuturePath Funds by PFSL, other services provided to the Mackenzie FuturePath Funds and to the Manager by PFSL include: (1) participation in the initial design of the Mackenzie FuturePath Funds, such that they have been tailored to the clients of PFSL; (2) review and certification of the prospectus in PFSL's capacity as principal distributor; (3) participation in a joint fund oversight committee with the Manager to monitor the ongoing performance and development of the funds; (4) providing the Manager and its representatives greater access to the branch offices of PFSL to allow PFSL to appropriately market and make recommendations about the Mackenzie FuturePath Funds to its clients; (5) providing ongoing customized training to its representatives to allow them to gain full insight about the Mackenzie FuturePath Funds in order to provide suitable recommendations to its clients. PFSL is responsible for costs associated with distributing securities of the funds, including all administration costs ("distribution-related payments"). After all distribution-related payments have been made, PFSL retains any remaining amount.
