

Interim Management Report of Fund Performance

For the Six-Month Period Ended September 30, 2024

This Interim Management Report of Fund Performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the exchange-traded fund (“ETF”). You may obtain a copy of the interim financial report or annual financial statements, at no cost, by calling the toll-free number 1-800-387-0614, by writing to us at Mackenzie Financial Corporation, 180 Queen Street West, Toronto, Ontario M5V 3K1, by visiting our website at www.mackenzieinvestments.com or by visiting the SEDAR+ website at www.sedarplus.ca.

Unitholders may also contact us using one of these methods to request a copy of the ETF’s proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the ETF’s Prospectus and ETF Facts, which may also be obtained, at no cost, using any of the methods outlined above. For the ETF’s current net asset value per unit and for more recent information on general market events, please visit our website.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates”, “preliminary”, “typical” and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2024

Management Discussion of Fund Performance

November 12, 2024

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the ETF's performance and outlook in the six-month period ended September 30, 2024 (the "period"). If the ETF was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the ETF. In addition, net asset value ("NAV") refers to the value of the ETF as calculated for subscription and redemption purposes, on which the discussion of ETF performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

Results of Operations

Investment Performance

During the period, the ETF returned 8.1% (after deducting fees and expenses). This compares with the Solactive Wealthsimple North America Socially Responsible Factor Index return of 8.0%. All index returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Canadian equities rose over the period despite volatility, with the financials sector and mining stocks leading market performance. In response to weak economic data and falling inflation, the Bank of Canada cut its policy rate in June, July and September. U.S. equities performed strongly over the period, driven by the information technology and communication services sectors. Moreover, the U.S. Federal Reserve cut its federal funds rate by 50 basis points, signalling its commitment to fostering economic growth. Defensive sectors, such as consumer staples and health care, lagged as fears of recession eased.

Through the period, the ETF invested substantially all its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index. Alternatively, the ETF may use a sampling methodology to invest in broadly diversified securities that collectively approximate the full index in terms of key characteristics.

The difference in performance between the ETF and the index resulted primarily from variations in the timing of currency conversions and income from securities lending. These factors were partially offset by management fees and other operating expenses.

Over the period, changes were made to the ETF's holdings to reflect changes in the composition of the index.

Environmental, Social and Governance ("ESG") Impact

The index seeks to avoid investing in companies that violate common social and environmental values; companies with involvement in fossil fuels, weapons manufacturing, or other controversial industries; and companies with insufficient gender representation at the board level. Revenue thresholds of 5% are used to determine involvement in controversial industries. The index excludes companies involved in oil, gas and thermal coal production, casinos and gaming, adult entertainment, tobacco, or alcohol, as well as excluding defence contractors and weapons manufacturers. Companies with a high carbon intensity relative to their industry are also excluded. A company in the index must have at least three women on its board or at least 25% of the board must be female. The index uses a multi-factor screen and risk weighting to improve diversification.

The index is rebalanced quarterly. Over the period, 25 securities were added to the ETF and 24 were eliminated, for a total of 203 at period-end. The addition and removal of securities may have resulted from non-ESG-related screens, as stated above. All the holdings earned 5% or less of their revenue from controversial industries.

Based on the most recent scope 1 and 2 greenhouse gas emissions intensity data, the weighted average carbon intensity of the portfolio was 29 metric tons of carbon dioxide-equivalent emissions per million U.S. dollars of revenue ("tCO₂e/US\$M") at September 30, 2024. (The Greenhouse Gas Protocol defines scope 1 as direct emissions from fuel burned in a company's owned or controlled assets and/or chemical leaks and spills, and scope 2 as indirect emissions from purchased electricity, cooling, heat and/or steam.) In comparison, the weighted average carbon intensity of the portfolio was 38 tCO₂e/US\$M at March 31, 2024 (based on 2021 intensity data). (All data is from MSCI ESG Research LLC.)

Net Assets

The ETF's net assets increased by 12.6% during the period to \$744.0 million. This change was composed primarily of \$54.7 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$28.4 million due to net unitholder activity (including sales, redemptions and cash distributions).

Recent Developments

Because the ETF is an index fund, neither market expectations nor recent developments affect the composition of the portfolio.

The following changes to the Mackenzie Funds' Independent Review Committee occurred:

- effective September 13, 2023, Saijal Patel was appointed;
- effective March 5, 2024, Atul Tiwari resigned; and
- effective April 30, 2024, the terms for Robert Hines and George Hucal expired, and Rebecca Cowdery was appointed.

Related Party Transactions

Management Fees

The annualized management expense ratio ("MER") for the ETF during the period ended September 30, 2024, was similar to the MER for the year ended March 31, 2024. Total expenses paid vary from period to period mainly as a result of changes in average assets in the ETF. The MERs are presented in the *Financial Highlights* section of this report. The ETF paid management fees to the Manager at the annual rate of 0.20%.

The management fee for the ETF is calculated and accrued daily as a percentage of its NAV. The ETF's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the ETF, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, providing other services and licensing the index, and to pay for all costs and expenses (other than certain specified fund costs as more fully described in the Prospectus) required to operate the ETF.

Other Related Party Transactions

The Manager is wholly owned by IGM Financial Inc., which in turn is a subsidiary of Power Corp. of Canada. Companies related to Power Corp. of Canada are therefore considered affiliates of the Manager. At September 30, 2024, the ETF held the following investment(s) in companies affiliated with the Manager: \$1.6 million invested in securities issued by IGM Financial Inc., \$2.1 million invested in securities issued by Power Corp. of Canada and \$2.3 million invested in securities issued by Great-West Lifeco Inc. The investment(s) represented 0.8% of the ETF's NAV. In making the investment(s), the Manager relied on the approval of the Mackenzie Funds' Independent Review Committee. The Independent Review Committee issued the approval on the basis that the investment(s) would be made in compliance with the Manager's policies. The Manager's policies are designed to ensure that any related party transaction (i) is made free from any influence by an

WEALTHSIMPLE NORTH AMERICA SOCIALLY RESPONSIBLE INDEX ETF

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2024

entity related to the Manager and without taking into account any considerations relevant to an entity related to the Manager; (ii) represents the business judgment of the Manager, uninfluenced by considerations other than the best interests of the ETF; and (iii) achieves a fair and reasonable result for the ETF.

Past Performance

The ETF's performance information assumes all distributions made by the ETF in the periods presented are reinvested in additional units of the ETF. The performance information does not take into account brokerage commissions or income taxes payable by any investor that would have reduced returns or performance. The past performance of the ETF is not necessarily an indication of how it will perform in the future.

If you hold this ETF outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units of the ETF. The amount of reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gain or increase your capital loss when you later sell from the ETF, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The following bar chart presents the performance of the ETF for each of the fiscal periods shown. The chart shows, in percentage terms, how much an investment made on the first day of each fiscal period, or on the ETF's inception date (June 16, 2020), as applicable, would have increased or decreased by the last day of the fiscal period presented.

Total annual distributions³	(0.29)	(0.37)	(0.41)	(2.81)	(0.63)
Net assets, end of period	43.51	40.55	34.77	32.50	29.98

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per unit. This information is derived from the ETF's unaudited interim financial statements and audited annual financial statements. The net assets per unit presented in the financial statements may differ from the net asset value per unit calculated for ETF pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional units of the ETF, or both.

RATIOS AND SUPPLEMENTAL DATA

CAD Units (Ticker: WSRI)	Sep. 30 2024	Mar. 31 2024	Mar. 31 2023	Mar. 31 2022	Mar. 31 2021
Total net asset value (\$000) ¹	744,021	660,902	545,882	490,755	347,726
Units outstanding (000) ¹	17,100	16,300	15,700	15,100	11,600
Management expense ratio (%) ²	0.22	0.22	0.22	0.22	0.22
Management expense ratio before waivers or absorptions (%) ²	0.22	0.22	0.22	0.22	0.22
Trading expense ratio (%) ³	0.01	0.01	0.02	0.02	0.02
Trading expense ratio before reimbursements (%) ³	0.01	0.01	0.02	0.02	0.02
Portfolio turnover rate (%) ⁴	20.38	52.23	41.66	70.93	n/a
Net asset value per unit (\$)	43.51	40.55	34.77	32.50	29.98
Closing market price (\$) ⁵	43.51	40.41	34.63	32.57	30.02

(1) This information is provided as at the end of the fiscal period shown.

(2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. If the ETF was established in the period, the MER is annualized from the date of inception to the end of the period. Where the ETF directly invests in securities of another fund (including other ETFs), the MER presented for the ETF includes the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.

(3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period. Where the ETF invests in securities of another fund (including other ETFs), the TER presented for the ETF includes the portion of TERs of the other fund(s) attributable to this investment. The Manager may reimburse the ETF for certain brokerage commissions and other transaction costs (including those payable to the custodian or its agents). The Manager may make these reimbursements at its discretion and stop these reimbursements at any time without notice.

(4) The ETF's portfolio turnover rate indicates how actively the ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher the ETF's portfolio turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the ETF. The portfolio turnover rate is not provided when the ETF is less than one year old.

(5) Closing market price, or the midpoint of the bid and ask prices in the absence of a closing market price, on the last trading day of the period as reported on the Toronto Stock Exchange.
